1.0 Title and Introduction

1.1 Title

Rehabilitation, Development and Recommencement the operations of the Kurunchathivu Saltern on a Public Private Partnership (“PPP”) basis (“**the Project**”).

1.2 Introduction

This EOI is issued by the Ministry of Industry and Entrepreneurship Development, Government of Sri Lanka, for the rehabilitation and recommencement of the Kurunchathivu Saltern. The Project aims to enhance salt production capacity, introduce modern production and processing technologies, and establish value-added salt products including Pure Dried Vacuum Salt (PDV) through a PPP model.

The Investor shall design, build, finance, operate, maintain, and transfer the saltern, including all associated infrastructure and installations developed or rehabilitated for the purposes of the Project (**the “Facility”**), for a period of twenty (20) years, excluding an initial two (2)-year construction period, with a possible extension subject to cabinet approval. The Project will contribute to national self-sufficiency in salt production, reduce reliance on imports, and support both industrial and household demand.

1.2.1 Preamble

National Salt Ltd has long history in salt production in Sri Lanka. It manufactures common salt, iodine mixed table and crystal salt, crush salt and Industrial salt. The major production areas are located in Mannar and Elephant Pass (Kilinochchi District) and its administrative office located in Colombo.

The salt department was established in 1938 and went through different administrative control and finally the salterns in Northern province were come under the administration of the company name of Mantai Salt Ltd from 2001 and in June 2021 it is renamed as National Salt Limited and now functioning under the purview of Ministry of Industry and Entrepreneurship Development. The salt is being recognized as best in quality (96% is NaCl). Currently Mannar Saltern has capacity to produce 5,500MT of raw salt and the Elephant Pass Saltern has capacity to produce 20,000MT per annum and subject to develop further to reach 25,000MT/annum in future.

The National Salt Limited not only functions as a natural resource extracting center also giving focus on employment opportunities to the vulnerable people in the Mannar and Kilinochchi districts. As at today there are 70 permanent /Contract staff and roughly 200 - 300 seasonal staff are employed by the institution.

National Salt Ltd is governing by the board which comprised by the members represent from Treasury and other government /private institutions and it comes under the purview of Ministry of Industry and Entrepreneurship Development. The Policy Development division of the Ministry is monitoring and facilitating the development, legal and accountable matters of the company. As it is a government enterprise it is registered under the Companies Act. No. 7 of 2007 as a Limited Company to abide for the company rules. Meanwhile the institution is certified by the Sri Lanka Standards Institution to ensure the quality of the product. And also, the company is being audited by the Auditor General Department.

1.2.1.1 Present Situation of Kurunchathivu Saltern

The saltern located at the Northern part of Elephant Pass Saltern adjoining the A9 road in Pachchilaipalli Divisional Secretariat Division, Kilinochchi District. Due to the conflict situation in the country that prevailed in the past, the Kurunchathivu Saltern had not been in operation for the last 34 years, yet remnants of the basic structure of the Saltern still remain with necessary marks such as salt pans and deep tanks. A total land extent of 750 acres is available for the renovation and development of the Kurunchathivu Saltern and in addition 423 acres of natural lagoon is attached to the land area which is to be used as primary reservoir.

1.2.1.2 Rationale of the Project:

Currently, Sri Lanka requires approximately 200,000MT common salt per annum for both household consumption and industrial purposes. Existing Salterns in the country are able to meet local demand under favorable climate conditions; however, the local production is insufficient to cater to the local market under adverse weather situations with the conventional salt production techniques. Meanwhile, the domestic demand could surge by another 20,000MT in future in the event if Paranthan Chemical Company Ltd resumes its operations in the chemical factory in Paranthan, Kilinochchi. Further, the domestic salt industry also has the potential to reach export markets if the local production exceeds beyond self-sufficiency level. Therefore, a separate project namely Kurunchathivu Saltern Project (KSP) was recognized for the rehabilitation, development, recommencement and operation of Saltern located at Kurunchathivu.

Considering the above facts, the Cabinet of Ministers has granted its approval by the Cabinet Decision on 18.08.2025 and referred by the CP No. 25/1439/810/018-1 to commence the operation of the Kurunchathivu Saltern Project (KSP) as a Public Private Partnership (PPP) with a potential investor. Hence, the Cabinet Appointed Negotiation Committee (CANC) was appointed to procure a suitable investor for the Kurunchathivu Saltern Project has decided to apply two stage, two-envelope procurement method. Hence, the CANC calls for Expression of Interest (EOI) as stage one to shortlist potential investors and as the stage two Request for Proposal (RFP). The RFP document will be issued to the shortlisted investors who have expressed their interest in this project.

1.0 Title and Introduction

1.1 Title

Rehabilitation, Development and Recommencement the operations of the Kurunchathivu Saltern on a Public Private Partnership (“PPP”) basis (“**the Project**”).

1.2 Introduction

This EOI is issued by the Ministry of Industry and Entrepreneurship Development, Government of Sri Lanka, for the rehabilitation and recommencement of the Kurunchathivu Saltern. The Project aims to enhance salt production capacity, introduce modern production and processing technologies, and establish value-added salt products including Pure Dried Vacuum Salt (PDV) through a PPP model.

The Investor shall design, build, finance, operate, maintain, and transfer the saltern, including all associated infrastructure and installations developed or rehabilitated for the purposes of the Project (**the “Facility”**), for a period of twenty (20) years, excluding an initial two (2)-year construction period, with a possible extension subject to cabinet approval. The Project will contribute to national self-sufficiency in salt production, reduce reliance on imports, and support both industrial and household demand.

1.2.1 Preamble

National Salt Ltd has long history in salt production in Sri Lanka. It manufactures common salt, iodine mixed table and crystal salt, crush salt and Industrial salt. The major production areas are located in Mannar and Elephant Pass (Kilinochchi District) and its administrative office located in Colombo.

The salt department was established in 1938 and went through different administrative control and finally the salterns in Northern province were come under the administration of the company name of Mantai Salt Ltd from 2001 and in June 2021 it is renamed as National Salt Limited and now functioning under the purview of Ministry of Industry and Entrepreneurship Development. The salt is being recognized as best in quality (96% is NaCl). Currently Mannar Saltern has capacity to produce 5,500MT of raw salt and the Elephant Pass Saltern has capacity to produce 20,000MT per annum and subject to develop further to reach 25,000MT/annum in future.

The National Salt Limited not only functions as a natural resource extracting center also giving focus on employment opportunities to the vulnerable people in the Mannar and Kilinochchi districts. As at today there are 70 permanent /Contract staff and roughly 200 - 300 seasonal staff are employed by the institution.

National Salt Ltd is governing by the board which comprised by the members represent from Treasury and other government /private institutions and it comes under the purview of Ministry of Industry and Entrepreneurship Development. The Policy Development division of the Ministry is monitoring and facilitating the development, legal and accountable matters of the company. As it is a government enterprise it is registered under the Companies Act. No. 7 of 2007 as a Limited Company to abide for the company rules. Meanwhile the institution is certified by the Sri Lanka Standards Institution to ensure the quality of the product. And also, the company is being audited by the Auditor General Department.

1.2.1.1 Present Situation of Kurunchathivu Saltern

The saltern located at the Northern part of Elephant Pass Saltern adjoining the A9 road in Pachchilaipalli Divisional Secretariat Division, Kilinochchi District. Due to the conflict situation in the country that prevailed in the past, the Kurunchathivu Saltern had not been in operation for the last 34 years, yet remnants of the basic structure of the Saltern still remain with necessary marks such as salt pans and deep tanks. A total land extent of 750 acres is available for the renovation and development of the Kurunchathivu Saltern and in addition 423 acres of natural lagoon is attached to the land area which is to be used as primary reservoir.

1.2.1.2 Rationale of the Project:

Currently, Sri Lanka requires approximately 200,000MT common salt per annum for both household consumption and industrial purposes. Existing Salterns in the country are able to meet local demand under favorable climate conditions; however, the local production is insufficient to cater to the local market under adverse weather situations with the conventional salt production techniques. Meanwhile, the domestic demand could surge by another 20,000MT in future in the event if Paranthan Chemical Company Ltd resumes its operations in the chemical factory in Paranthan, Kilinochchi. Further, the domestic salt industry also has the potential to reach export markets if the local production exceeds beyond self-sufficiency level. Therefore, a separate project namely Kurunchathivu Saltern Project (KSP) was recognized for the rehabilitation, development, recommencement and operation of Saltern located at Kurunchathivu.

Considering the above facts, the Cabinet of Ministers has granted its approval by the Cabinet Decision on 18.08.2025 and referred by the CP No. 25/1439/810/018-1 to commence the operation of the Kurunchathivu Saltern Project (KSP) as a Public Private Partnership (PPP) with a potential investor. Hence, the Cabinet Appointed Negotiation Committee (CANC) was appointed to procure a suitable investor for the Kurunchathivu Saltern Project has decided to apply two stage, two-envelope procurement method. Hence, the CANC calls for Expression of Interest (EOI) as stage one to shortlist potential investors and as the stage two Request for Proposal (RFP). The RFP document will be issued to the shortlisted investors who have expressed their interest in this project.

1.0 Title and Introduction

1.1 Title

Rehabilitation, Development and Recommencement the operations of the Kurunchathivu Saltern on a Public Private Partnership (“PPP”) basis (“**the Project**”).

1.2 Introduction

This EOI is issued by the Ministry of Industry and Entrepreneurship Development, Government of Sri Lanka, for the rehabilitation and recommencement of the Kurunchathivu Saltern. The Project aims to enhance salt production capacity, introduce modern production and processing technologies, and establish value-added salt products including Pure Dried Vacuum Salt (PDV) through a PPP model.

The Investor shall design, build, finance, operate, maintain, and transfer the saltern, including all associated infrastructure and installations developed or rehabilitated for the purposes of the Project (**the “Facility”**), for a period of twenty (20) years, excluding an initial two (2)-year construction period, with a possible extension subject to cabinet approval. The Project will contribute to national self-sufficiency in salt production, reduce reliance on imports, and support both industrial and household demand.

1.2.1 Preamble

National Salt Ltd has long history in salt production in Sri Lanka. It manufactures common salt, iodine mixed table and crystal salt, crush salt and Industrial salt. The major production areas are located in Mannar and Elephant Pass (Kilinochchi District) and its administrative office located in Colombo.

The salt department was established in 1938 and went through different administrative control and finally the salterns in Northern province were come under the administration of the company name of Mantai Salt Ltd from 2001 and in June 2021 it is renamed as National Salt Limited and now functioning under the purview of Ministry of Industry and Entrepreneurship Development. The salt is being recognized as best in quality (96% is NaCl). Currently Mannar Saltern has capacity to produce 5,500MT of raw salt and the Elephant Pass Saltern has capacity to produce 20,000MT per annum and subject to develop further to reach 25,000MT/annum in future.

The National Salt Limited not only functions as a natural resource extracting center also giving focus on employment opportunities to the vulnerable people in the Mannar and Kilinochchi districts. As at today there are 70 permanent /Contract staff and roughly 200 - 300 seasonal staff are employed by the institution.

National Salt Ltd is governing by the board which comprised by the members represent from Treasury and other government /private institutions and it comes under the purview of Ministry of Industry and Entrepreneurship Development. The Policy Development division of the Ministry is monitoring and facilitating the development, legal and accountable matters of the company. As it is a government enterprise it is registered under the Companies Act. No. 7 of 2007 as a Limited Company to abide for the company rules. Meanwhile the institution is certified by the Sri Lanka Standards Institution to ensure the quality of the product. And also, the company is being audited by the Auditor General Department.

1.2.1.1 Present Situation of Kurunchathivu Saltern

The saltern located at the Northern part of Elephant Pass Saltern adjoining the A9 road in Pachchilaipalli Divisional Secretariat Division, Kilinochchi District. Due to the conflict situation in the country that prevailed in the past, the Kurunchathivu Saltern had not been in operation for the last 34 years, yet remnants of the basic structure of the Saltern still remain with necessary marks such as salt pans and deep tanks. A total land extent of 750 acres is available for the renovation and development of the Kurunchathivu Saltern and in addition 423 acres of natural lagoon is attached to the land area which is to be used as primary reservoir.

1.2.1.2 Rationale of the Project:

Currently, Sri Lanka requires approximately 200,000MT common salt per annum for both household consumption and industrial purposes. Existing Salterns in the country are able to meet local demand under favorable climate conditions; however, the local production is insufficient to cater to the local market under adverse weather situations with the conventional salt production techniques. Meanwhile, the domestic demand could surge by another 20,000MT in future in the event if Paranthan Chemical Company Ltd resumes its operations in the chemical factory in Paranthan, Kilinochchi. Further, the domestic salt industry also has the potential to reach export markets if the local production exceeds beyond self-sufficiency level. Therefore, a separate project namely Kurunchathivu Saltern Project (KSP) was recognized for the rehabilitation, development, recommencement and operation of Saltern located at Kurunchathivu.

Considering the above facts, the Cabinet of Ministers has granted its approval by the Cabinet Decision on 18.08.2025 and referred by the CP No. 25/1439/810/018-1 to commence the operation of the Kurunchathivu Saltern Project (KSP) as a Public Private Partnership (PPP) with a potential investor. Hence, the Cabinet Appointed Negotiation Committee (CANC) was appointed to procure a suitable investor for the Kurunchathivu Saltern Project has decided to apply two stage, two-envelope procurement method. Hence, the CANC calls for Expression of Interest (EOI) as stage one to shortlist potential investors and as the stage two Request for Proposal (RFP). The RFP document will be issued to the shortlisted investors who have expressed their interest in this project.
